Execution of Regasification Agreement between Petronet LNG Limited and Performance Chemiserve Limited

Performance Chemiserve Limited (PCL), a wholly owned subsidiary of Deepak Mining Solutions Limited (DMSL) which is a wholly owned subsidiary of Deepak Fertilisers and Petrochemicals Corporation Limited (DFPCL) and Petronet LNG Limited (PLL) have entered into a 5.5 years (commencing between May 2026 – July 2026 and ending on 31st December 2031) agreement for the regasification of Liquefied Natural Gas (LNG) to be imported by DFPCL group. Under the terms of the agreement, PLL will receive, store and regasify approximately 25.6 TBTUs of LNG annually, post an initial ramp-up period in calendar year 2026, at its Dahej terminal. This agreement will generate revenue of about Rs. 1200 crore for PLL with an upside potential to generate an additional revenue of upto 20%, over the contract duration. The regasified gas will be primarily utilised in manufacturing units of DFPCL group at Taloja.

This agreement further expands the long-term business horizons of PLL, an energy & infrastructure company. PLL handled around 18 MMTPA LNG in FY 2024-25 through its two terminals with Dahej being the flagship and one of the busiest regas terminals in the world.

Earlier, an LNG Sale and Purchase Agreement was signed by DFPCL with Equinor, a global energy major headquartered in Norway. Now, the regasification agreement has been signed between PLL and PCL, a leading producer of fertilizers and industrial chemicals using natural gas and a DFPCL group company. These agreements reinforce DFPCL Group's strategic position across the value chain—from Natural Gas to Ammonia, further downstream into Building Block Nitric Acid and into a diversified portfolio of NPK fertilisers, industrial chemicals, and mining chemicals.

The regasification agreement was signed on July 10, 2025, at PLL's corporate office in New Delhi in the presence of Shri A. K. Singh, Managing Director & CEO of PLL, and Shri Sailesh C. Mehta, Chairman of PCL and DFPCL.

About Petronet LNG Limited (PLL)

Petronet LNG Limited is a joint venture promoted by four Oil & Gas Maharatna PSUs—GAIL, ONGC, IOCL, and BPCL—each holding a 12.5% equity stake. Incorporated in 1998, PLL commands 43% of India's LNG regasification capacity and manages around 2/3rd of the nation's LNG imports. With a turnover of approximately INR 51,000 crore in FY 2024–25, PLL plays a vital role in India's energy ecosystem, contributing about 33% of the country's total natural gas supply.

PLL with two LNG regasification terminals at Dahej, Gujarat and Kochi, Kerala has a total regasification capacity of 22.5 MMTPA which is under further augmentation through expansion of Dahej terminal and a greenfield terminal on East Coast of India at Gopalpur, Odisha. Further, PLL is also setting up a 750 KTA PDH and 500 KTA PP unit at Dahej, Gujarat and constructing a unique third jetty which will be capable of handling LNG, Ethane and Propane.

About Deepak Fertilisers and Petrochemicals Corporation Limited (DFPCL) group

Headquartered in Pune, DFPCL is a diversified, publicly listed conglomerate with strong market leadership in Technical Ammonium Nitrate, Industrial Chemicals, and Crop Nutrition. Its manufacturing footprint spans four states—Maharashtra, Gujarat, Andhra Pradesh, and Haryana.

DFPCL is India's leading manufacturer of Iso Propyl Alcohol (IPA) and South East Asia's largest producer of Nitric Acid. It is also the only Indian company producing prilled Technical Ammonium Nitrate solids, including medical-grade Ammonium Nitrate. In addition, the company delivers advanced technical services to mining clients.

Through its Crop Nutrition Business, DFPCL offers 48 differentiated products, impacting over 5 million farmers across India. Its R&D-driven innovations in enhanced-efficiency fertilisers have led to significant yield and quality improvements across major crops.

Performance Chemiserve Limited (PCL), a wholly owned subsidiary of Deepak Mining Solutions Limited (DMSL) which is a wholly owned subsidiary of Deepak Fertilisers and Petrochemicals Corporation Limited (DFPCL) and is a leading producer of fertilizers and industrial chemicals using natural gas.
